PADS

Marathon

Padding with high density of foam (120kg / m³), non-removable materials without excess, elastic and light weight without any adhesive. High transpirability. Guarantees a long life, in male and female versions.

Endurance Anatomic 2

The original pad's design was obtained by special sewing technique. This feature and the characteristic half-moon shape make for improved wear-ability while providing greater stability in saddle.

Performance Space Force

Product of Excellence for extra-long distance rides. Ultra-high density and multidirectional curvature structure delivers perfect fit and great stability in saddle. Performance space gives ischiatic support and guarantees perfect movement during rides.

Endurance 3

Excellent pad for long distance rides. The "combination foam insert" provides to spread pressure in different key points (ischiatric and pelvic zone).

Triathlon unisex

Standard unisex triathlon pad.

Liege

The perfect combination of perforated foams with different densities. Provides to extra breathability and movement. It's foam inserts are shaped to be very minimalist and the top layer of the pad in contact with rider is entirely smooth.

Marte

It is a very comfortable and light pad. Soft, breathable and fast drying. The foam (density 80 kg / m³) settles on the support parts, leaving freedom of movement in the other areas. The foam is very open allowing greater breathability and ventilation.

Badia

It has a base open cell foam (density 100 kg / m³) and one 12 mm thick. The holes are 3 mm, allowing breathability, freshness and quick drying.

Comfort

Comfort pad with lateral pad mold 90° square system can give an ergonomic fit. Foam system can guarantee a great support for all kind of athletes. It is perfect for road but also for MTB.

CUSTOM

Relying on VIFRA for your team's clothing means having a wide range of items for cycling, mtb, running, triathlon and Nordic skiing available. A direct relationship with the company for both the commercial aspect and the design of the articles and design.

A WIDE RANGE OF ITEMS

The VIFRA range covers all the needs of a team. Articles diversified by gender, climate, quality and team attitudes.

The continuous research on fabrics, the modeling studio and the designers guarantee a product that is always at the forefront, which will dress your team with quality and style.

TAILORED TO YOUR TEAM

Guided by our experience, select the articles for your team. Also choose any options to add to your kit.

A wide range of sizes, for adults and children, specific fits and pads for men and women and complete lines for winter, summer and mid-season.

FROM THE IDEA TO THE DESIGN

The next step is to submit your graphic idea to us. You can start from an evolution of your previous uniform, from an idea seen from another uniform, from our ready-made designs or rely on our creativity.

Then our designers, thanks to the VIFRA 3D Preview system, will submit your ideas developed on realistic 3d simulations, in order to make immediately visible what the project yield will be.

AMAZING COLORS!

Thanks to an advanced printing system, VIFRA can print all the desired color tones. Choose the colors for your kit together with our designers. From fluorescent colors to turquoise, from deep black to gold, we have no limits in choice.

READY TO GO!

After the confirmation of the project for articles, sizes and designs we are ready to start with the production. The process lasts approximately 30 days. Our office is at your disposal to follow the production times

YOUR KIT IS READY

Once your order has been packaged, we will proceed to ship it all over the world. Afterwards, for any reordering, we ask you to respect a minimum of 10 items.

All that remains is to wear your kit and, perhaps, show it off on the street and on social networks with our tags!

SERVICE

To customize your event in all its aspects, Vifra also offers a race service.
