ENERGY Bib short

ENERGY BIB SHORTS CLEAN CUT

The fabric used creates a "second skin" effect, which limits the rise of the shorts during the action, even though the ends are free from non-slip elastics and seams. The shoulder straps have Lycra components in contact with the skin, in order to improve comfort and grip. between the mesh there is a breathable insert that improves the fit.

energy

The Vifra ENERGY line, for road and MTB, has been renewed to guarantee the top of the range.
A mix of fabrics and a particular shorts make it ideal for demanding cyclists.

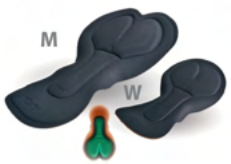
PADS



Marathon
Padding with high density of foam (120kg / m3), non-removable materials without excess, elastic and light weight without any adhesive. High transpirability. Guarantees a long life, in male and female versions.

7h 8h

Endurance Anatomic 2
The original pad's design was obtained by special sewing tecnique. This feature and the charateristic half-moon shape make for improved wear-ability while providing greater stability in saddle.

4h 6h EIT CARBONIUM FLASH

Performance Space Force
Product of Excellence for extra- long distance rides. Ultra-high density and multidirectional curvature structure delivers prefect fit and great stability in saddle. Performance space gives ischiatic support and guarantees perfect movement during rides.

4h 6h EIT CARBONIUM FLASH + MAX

Endurance 3
Excellent pad for long distance rides. The "combination foam insert" provides to spread pressure in differents key points (ischiatic and pelvic zone).

+7h EIT CARBONIUM FLASH

Triathlon unisex
Standard unisex triathlon pad.

Liege
The perfect combination of perforated foams with different densities. Provides to extra breathability and movement. It's foam inserts are shaped to be very minimalist and the top layer of the pad in contact with rider is entirely smooth

4h 6h EIT X-TRACT

Marte
It is a very comfortable and light pad. Soft, breathable and fast drying. The foam (density 80 kg / m3) settles on the support parts, leaving freedom of movement in the other areas. The foam is very open allowing greater breathability and ventilation.

4h 6h

Badia
It has a base open cell foam (density 100 kg / m3) and one 12 mm thick. The holes are 3 mm, allowing breathability, freshness and quick drying.

4h 5h

Comfort
Comfort pad with lateral pad mold 90° square system can give an ergonomic fit. Foam system can guarantee a great support for all kind of athletes. It is perfect for road abut also for MTB.

4h 6h BLAZER POLIESTERE
